

LOCTITE®

Instant Gasket

PROBLEM

conventional cut gaskets

- All size gaskets are impossible to inventory.
- Waiting for replacement cut gaskets is extremely costly.
- Compression set causes gaskets to leak.
- Gaskets don't seal well on irregular surfaces.
- Stocking + sourcing + cutting + seating = UNNECESSARY MACHINE DOWNTIME

SOLUTION

Instant Gasket

- Provides a low-pressure instant seal to return equipment to service immediately.
- Saves you time with fast, reliable on-site applications.
- Prevents leaks caused by vibration and thermal expansion.
- Effectively seals scored or irregular surfaces.
- ALWAYS AVAILABLE when you need it.

Any gasket...any shape...any time!
Instant Gasket!

Specifically designed to provide end users with significant cost savings and more reliable performance, Instant Gasket is an ideal replacement for most conventional rubber, cork, paper, and felt gaskets.

MAKE ANY SIZE OR SHAPE INDUSTRIAL GASKET

GASKET SELECTION

PERFORMANCE RESULTS

Impacting Factors	Cut Gaskets	Instant Gasket
Reliable, long in-service life	Poor	Excellent
Oil/Coolant/Temperature resistance	Poor	Excellent
Seals consistently	Fair	Excellent
Ability to seal scored or irregular surfaces	Poor	Excellent

- Effective to 450°F in continuous operating environments, 500°F intermittent
- Superior oil resistance
- Non-corrosive
- Non-slumping
- Protects against leaks caused by vibration and thermal expansion

Applications: Replacing conventional cut gaskets on industrial machines, compressors, gearboxes, oil pans, side covers, stamped sheet metal covers.

SAVES MONEY ... 1/4 THE COST OF CUT GASKETS

ORDERING INFORMATION

Part No.	Description	Qty. per case
30507	7 oz. pressurized can	6
30509	5 oz. cartridge	6
30684	4 oz. pressurized can	6

Typical cut gasket
(54 linear inches)

One 7 oz. can of **Instant Gasket** yields approximately 672 linear inches of gasket material.

- More than 12 typical cut gaskets in an easy-to-use, patented, pressurized container.
